SUMMARY

Our key activity is channelling funds obtained in Norway to suitable SD projects all over the world. Fund-raising efforts have been directed mainly to Subud members. We have no special publication.

2006 ACCOMPLISHMENTS

After a reorganization late 2005, the year 2006 has been used to find a way of proceeding that is commensurate with our resources. A considerable donation from one member has made it possible to contribute to several projects, while emergency relief has been financed mainly from earmarked member contributions. We have contributed to projects in Congo and made a pledge for a project in India. In Congo, we have continued our support to the Lemba Imbu School and helped to purchase a permanent property for the Yenge Clinic.

GOALS FOR COMING YEARS

We hope to be able to stimulate more interest for participation in SD activities in Norway. Specific goals for the coming years will depend on the level of participation, financially and in practice, from Subud members. For the time being, we will continue our policy of searching for projects where we feel that our support can make a difference.

NETWORK ASSISTANCE

We are dependent on SDI for information about projects recommended for support. We are in the process of beginning a cooperation with SD Germany for support of a project in India.
